# StoneHedge® XL

## StoneHedge® XL Block

Unit specifications, availability, color, and fascia options vary by manufacturer. Please contact your nearest Rockwood manufacturer or dealer for more information.

### Double Sided, Straight Split

**Size:** 6" H x 18" W x 10" D

**Weight:** 64 lbs.

## The Advantages of the StoneHedge® System...

**It's Fast...** The uncomplicated design makes installation quick and easy.

**It's Simple...** Prepare the base, set the block, and build a limitless number of applications. With StoneHedge's one-unit construction method you can easily build privacy walls, partition walls, pillars, seat walls, light posts, and more!

**It's Strong...** Upon construction, StoneHedge XL blocks create cores. When filled with gravel, these cores create vertical "stone columns" allowing you to build up to 6 feet high without reinforcement.

**It's Versatile...** By simply cutting StoneHedge XL, inside and outside radius curves are easily accomplished.

**ROCKWOOD®**  
RETAINING WALLS  
*A better way.™*
